

Hot Chili Commences TSXV Dual Listing Process

Hot Chili Limited (ASX: HCH) (OTCQB: HHLKF) (“Hot Chili” or “Company”) is pleased to announce its intention to list in Canada on the TSX Venture Exchange (TSXV) by end of 2021

Hot Chili’s move to dual list in Canada is a key step toward the future funding and development of the Company’s large-scale Costa Fuego copper-gold project in Chile.

The Company has paid application fees, appointed legal advisors and commenced the formal application process for dual listing.

The Canadian market has a proven track record in supporting large-scale exploration and development companies in the copper and gold space with the transformative dual listings from Equinox Minerals (C\$7.3Bn takeover by Barrick Gold Corp) and Andean Resources Limited (C\$3.6Bn takeover by Goldcorp Inc) the stand-outs.

Costa Fuego’s current resource stands at 724Mt grading 0.48% CuEq for 3.5Mt CuEq metal (2.9Mt copper, 2.7Moz gold, 9.9Moz silver and 64kt molybdenum). Continued drilling success at the Company’s flagship Cortadera porphyry discovery looks set to deliver another significant resource upgrade this year.

A TSXV dual listing would position Hot Chili favourably amongst its Canadian peers which trade at significantly higher valuation multiples and who control the other leading copper developments in South America such as Marimaca Copper Corp. (Chile, TSXV:MARI), Filo Mining Corp. (Argentina, TSXV:FIL), Solaris Resources Inc (Ecuador, TSX: SLS), Josemaria Resources Inc. (Chile, TSX: JOSE) and SolGold Plc (Ecuador, TSX: SOLG).

The Directors look forward to announcing key advisory appointments in relation to its TSXV dual listing process.

A listing on the TSXV is subject to all necessary approvals of the TSXV, and there can be no guarantee that Hot Chili will be accepted for listing pending completion of the application process.

Further news flow is expected shortly, with three drill rigs in operation, pre-feasibility studies underway and multiple exploration programmes advancing across the Company’s Cortadera and Santiago Z coastal copper projects.

This announcement is authorised by the Board of Directors for release to ASX.

* Copper Equivalent (CuEq) reported for the resource were calculated using the following formula: $CuEq\% = ((Cu\% \times Cu \text{ price } 1\% \text{ per tonne} \times Cu_recovery) + (Mo \text{ ppm} \times Mo \text{ price per g/t} \times Mo_recovery) + (Au \text{ ppm} \times Au \text{ price per g/t} \times Au_recovery) + (Ag \text{ ppm} \times Ag \text{ price per g/t} \times Ag_recovery)) / (Cu \text{ price } 1\% \text{ per tonne})$. The Metal Prices applied in the calculation were: Cu=3.00 USD/lb, Au=1,550 USD/oz, Mo=12 USD/lb, and Ag=18 USD/oz. For Cortadera (Inferred + Indicated), the average Metallurgical Recoveries were: Cu=83%, Au=56%, Mo=82%, and Ag=37%. For Productora (Inferred + Indicated), the average Metallurgical Recoveries were: Cu=83%, Au=51%, Mo=67% and Ag=23%.
