

29th September 2023

The Companies Officer
Australian Securities Exchange Ltd
Central Park,
152-158 St Georges Terrace,
Perth WA 6000

To Whom It May Concern,

HOT CHILI LTD MINERAL RESOURCE AND ORE RESERVE STATEMENT AS AT 30th JUNE 2023

Copper, Gold, Silver and Molybdenum Mineral Resources and Ore Reserves for Hot Chili Ltd (ASX:HCH), as at 30th June 2023, are reported in accordance with the Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves, December 2012 (the JORC Code) as required by the Australian Securities Exchange.

The enclosed Annual Review of the Ore Reserves and Mineral Resources will be included in the Hot Chili 2023 Annual Report.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Christian Easterday".

2023 Annual Review – Mineral Resources and Ore Reserves

This document outlines the Annual Review of Hot Chili Limited (Hot Chili or HCH) Mineral Resources and Ore Reserves (MROR) as of 30th June 2023. All Mineral Resource and Ore Reserve estimates are reported in accordance with the JORC 2012 standard and are based on, and fairly represent, information and supporting documentation prepared and approved by competent persons.

The commodities for this review include copper (Cu), gold (Au), silver (Ag) and molybdenum (Mo). Tonnage and quality information contained in the following tables has been rounded and as a result the figures may not add up to the totals quoted.

While Hot Chili does not have a dedicated governance group, the Mineral Resource and Ore Reserve estimation processes followed internally are well established and are subject to systematic internal peer review. Independent technical reviews and audits are undertaken during estimation and signoff, and on an as-required basis.

There were material changes to Hot Chili's Mineral Resources and Ore Reserves between the 1st of July 2022 and the 30th of June 2023 (the period covered by the company's annual report), owing to the release of an updated Preliminary Economic Assessment in June 2023.

Kirsty Sheerin

Resource Development Manager
Hot Chili Limited
29th September 2023

Productora Project

Tenements

The Productora Project is 100% owned by a Chilean incorporated company named Sociedad Minera El Aguila SpA (SMEA). SMEA is a Joint Venture company, 80% owned by Sociedad Minera El Corazón SpA (a 100% subsidiary of Hot Chili Limited), and 20% owned by CMP Productora (a 100% subsidiary of Compañía Minera del Pacífico S.A (CMP).

The Joint Venture agreement provided access to key infrastructure as well as securing an experienced major Chilean partner with substantial operational, financial and development capability. CMP previously had an Option to increase its stake in Productora to 50.1% following completion of the Definitive Feasibility Study (DFS). However, in March 2016 Hot Chili completed the Productora PFS and CMP did not elect at the time to exercise its Option. Hot Chili has since repaid CMP the Option fee and CMP has accepted the payment, removing all requirements over Productora.

There were no tenement changes that had a material impact on the Mineral Resources or Ore Reserves during the reporting period.

Mining Activity

There were no mining activities in the 12 months to 30th June 2023. There has been no depletion of the current publicly reported Mineral Resource.

Mineral Resources

There were no material changes to the Productora Project Mineral Resources (which includes the Productora and Alice projects) between 1st July 2022 and 30th June 2023. The current Mineral Resource estimate was publicly released on 31st March 2022 and included an updated estimation strategy following detailed studies into the Productora deposit.

A comparison between reporting periods is provided below.

Productora Project Mineral Resource at 30th June, 2022											
Classification	Tonnes	Grade					Contained Metal				
		CuEq ⁵	Cu	Au	Ag	Mo	Copper Eq ⁵	Copper	Gold	Silver	Molybdenum
(+0.21% CuEq) ⁵	(Mt)	(%)	(%)	(g/t)	(g/t)	(ppm)	(tonnes)	(tonnes)	(ounces)	(ounces)	(tonnes)
Indicated	253	0.49	0.41	0.08	-	139	1,247,000	1,043,000	646,000	-	35,100
Inferred	90	0.34	0.29	0.03	-	75	305,000	259,000	91,000	-	6,800
Total	343	0.45	0.38	0.07	-	122	1,552,000	1,302,000	737,000	-	41,900

Productora Project Mineral Resource at 30th June, 2023											
Classification	Tonnes	Grade					Contained Metal				
		CuEq ⁵	Cu	Au	Ag	Mo	Copper Eq ⁵	Copper	Gold	Silver	Molybdenum
(+0.21% CuEq) ⁵	(Mt)	(%)	(%)	(g/t)	(g/t)	(ppm)	(tonnes)	(tonnes)	(ounces)	(ounces)	(tonnes)
Indicated	253	0.49	0.41	0.08	-	139	1,247,000	1,043,000	646,000	-	35,100
Inferred	90	0.34	0.29	0.03	-	75	305,000	259,000	91,000	-	6,800
Total	343	0.45	0.38	0.07	-	122	1,552,000	1,302,000	737,000	-	41,900

1 Mineral Resources are reported on a 100% Basis. All figures are rounded, reported to appropriate significant figures, and reported in accordance with the Joint Ore Reserves Committee Code (2012).

2 The Productora deposit is 100% owned by Chilean incorporated company Sociedad Minera El Aguila SpA (SMEA). SMEA is a joint venture (JV) company – 80% owned by Sociedad Minera El Corazón Limitada (a 100% subsidiary of Hot Chili Limited), and 20% owned by CMP Productora (a 100% subsidiary of Compañía Minera del Pacífico S.A (CMP)).

3 The Mineral Resource estimates in the tables above form coherent bodies of mineralisation that are considered amenable to a combination of open pit and underground extraction methods based on the following parameters: Base Case Metal Prices: Copper US\$ 3.00/lb, Gold US\$ 1,700/oz, Molybdenum US\$ 14/lb, and Silver US\$20/oz.

4 Metallurgical recovery averages for each deposit consider Indicated + Inferred material and are weighted to combine sulphide flotation and oxide leaching performance. Productora – Weighted recoveries of 84% Cu, 47% Au, 47% Mo and 0% Ag (not reported). $CuEq(\%) = Cu(\%) + 0.46 \times Au(g/t) + 0.00026 \times Mo(ppm)$.

5 Resource Copper Equivalent (CuEq) grades are calculated based on the formula: $CuEq\% = ((Cu\% \times Cu \text{ price } 1\% \text{ per tonne} \times Cu_recovery) + (Mo \text{ ppm} \times Mo \text{ price per g/t} \times Mo_recovery) + (Au \text{ ppm} \times Au \text{ price per g/t} \times Au_recovery) + (Ag \text{ ppm} \times Ag \text{ price per g/t} \times Ag_recovery)) / (Cu \text{ price } 1\% \text{ per tonne} \times Cu$

recovery). The base case cut-off grade for mineral resources considered amenable to open pit extraction methods at the Cortadera, Productora and San Antonio deposits is 0.21% CuEq while the cut-off grade for mineral resources considered amenable to underground extraction methods at the Cortadera deposit is 0.3% CuEq.

6 Mineral resources are not mineral reserves and do not have demonstrated economic viability. These Mineral Resource estimates include Inferred Mineral Resources that are considered too speculative geologically to have economic considerations applied to them that would enable them to be categorised as Mineral Reserves. It is reasonably expected that the majority of Inferred mineral resources could be upgraded to Measured or Indicated Mineral Resources with continued exploration.

7 The effective date of the estimate of Mineral Resources is March 31st, 2022. Refer to ASX Announcement "Hot Chili Delivers Next Level of Growth" ("Resource Announcement") for JORC Code Table 1 information related to the Costa Fuego Resource Estimate (MRE) by Competent Person Elizabeth Haren, constituting the MREs of Cortadera, Productora and San Antonio (which combine to form Costa Fuego). Hot Chili confirms it is not aware of any new information or data that materially affects the information included in the Resource Announcement and all material assumptions and technical parameters stated for the Mineral Resource Estimates in the Resource Announcement continue to apply and have not materially changed.

8 Hot Chili Limited is not aware of political, environmental or other risks that could materially affect the potential development of the Mineral Resources

Ore Reserves

There were material changes to the Productora Project Ore Reserve between 1st July 2022 and 30th June 2023. The previous Ore Reserve estimate was released to the public on the 2nd March 2016 and included material from Alice and Productora deposits. Hot Chili released a Preliminary Economic Assessment in June 2023, which superseded the existing 2016 Productora Pre-Feasibility Study; Hot Chili no longer has Reserves at Productora.

A comparison between reporting periods is provided below.

Productora Project Ore Reserve at 30th June, 2022*											
Ore Type	Classification	Tonnes (Mt)	Grade			Contained Metal			Payable Metal		
			Cu (%)	Au (g/t)	Mo (ppm)	Copper (tonnes)	Gold (ounces)	Molybdenum (tonnes)	Copper (tonnes)	Gold (ounces)	Molybdenum (tonnes)
Oxide	Probable	24	0.43	0.08	49	103,000	59,600	1,200	55,600	-	-

Competent Person's Statement

Mineral Resources – Productora

The information in this report that relates to Mineral Resources for the Productora Project is based on information compiled by Elizabeth Haren, a Competent Person who is a Member and Chartered Professional of the Australasian Institute of Mining and Metallurgy and a Member of the Australian Institute of Geoscientists. Elizabeth Haren is employed as a Principal Geologist of Haren Consulting, who was engaged by Hot Chili Limited. Elizabeth Haren has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Elizabeth Haren consents to the inclusion in the report of the matters based on her information in the form and context in which it appears.

Cortadera Project

Tenements

Hot Chili owns the Cortadera Project through its 100% subsidiary company Sociedad Minera La Frontera SpA. Hot Chili controls an area measuring approximately 12.5 km north-south by 5 km east-west at the project through various 100% purchase option agreements with private land holders.

There were no tenement changes that had a material impact on the Mineral Resources during the reporting period.

Mining Activity

There were no mining activities in the 12 months to 30th June 2023. There has been no depletion of the current publicly reported Mineral Resource.

Mineral Resources

There were no material changes for the Cortadera Project Mineral Resources between 1st July 2022 and 30th June 2023. The current Mineral Resource was publicly released on 31st March 2022 and included 52,000m of additional Resource drilling, resulting in Resource growth and the upgrade of Inferred Resource to Indicated.

A comparison between reporting periods is provided below.

Cortadera Project Mineral Resource at 30th June, 2022											
Classification	Tonnes	Grade					Contained Metal				
		CuEq ⁵	Cu	Au	Ag	Mo	Copper Eq ⁵	Copper	Gold	Silver	Molybdenum

1 Mineral Resources are reported on a 100% Basis. All figures are rounded, reported to appropriate significant figures, and reported in accordance with the Joint Ore Reserves Committee Code (2012).

2 The Cortadera deposit is controlled by a Chilean incorporated company Sociedad Minera La Frontera SpA (Frontera). Frontera is a subsidiary company – 100% owned by Sociedad Minera El Corazón Limitada, which is a 100% subsidiary of Hot Chili Limited.

3 The Mineral Resource estimates in the tables above form coherent bodies of mineralisation that are considered amenable to a combination of open pit and underground extraction methods based on the following parameters: Base Case Metal Prices: Copper US\$ 3.00/lb, Gold US\$ 1,700/oz, Molybdenum US\$ 14/lb, and Silver US\$20/oz.

4 Metallurgical recovery averages for each deposit consider Indicated + Inferred material and are weighted to combine sulphide flotation and oxide leaching performance. Process recoveries: Cortadera – Weighted recoveries of 82% Cu, 55% Au, 82% Mo and 37% Ag. $CuEq(\%) = Cu(\%) + 0.56 \times Au(g/t) + 0.00046 \times Mo(ppm) + 0.0043 \times Ag(g/t)$.

5 Resource Copper Equivalent (CuEq) grades are calculated based on the formula: $CuEq\% = ((Cu\% \times Cu\ price\ 1\% \ per\ tonne \times Cu_recovery) + (Mo\ ppm \times Mo\ price\ per\ g/t \times Mo_recovery) + (Au\ ppm \times Au\ price\ per\ g/t \times Au_recovery) + (Ag\ ppm \times Ag\ price\ per\ g/t \times Ag_recovery)) / (Cu\ price\ 1\% \ per\ tonne \times Cu\ recovery)$. The base case cut-off grade for mineral resources considered amenable to open pit extraction methods at the Cortadera, Productora and San Antonio deposits is 0.21% CuEq while the cut-off grade for mineral resources considered amenable to underground extraction methods at the Cortadera deposit is 0.3% CuEq.

6 Mineral resources are not mineral reserves and do not have demonstrated economic viability. These Mineral Resource estimates include Inferred Mineral Resources that are considered too speculative geologically to have economic considerations applied to them that would enable them to be categorised as Mineral Reserves. It is reasonably expected that the majority of Inferred mineral resources could be upgraded to Measured or Indicated Mineral Resources with continued exploration.

7 The effective date of the estimate of Mineral Resources is March 31st, 2022. Refer to ASX Announcement "Hot Chili Delivers Next Level of Growth" ("Resource Announcement") for JORC Code Table 1 information related to the Costa Fuego Resource Estimate (MRE) by Competent Person Elizabeth Haren,

constituting the MREs of Cortadera, Productora and San Antonio (which combine to form Costa Fuego). Hot Chili confirms it is not aware of any new information or data that materially affects the information included in the Resource Announcement and all material assumptions and technical parameters stated for the Mineral Resource Estimates in the Resource Announcement continue to apply and have not materially changed.

8 Hot Chili Limited is not aware of political, environmental or other risks that could materially affect the potential development of the Mineral Resources

Competent Person's Statement

Mineral Resources – Cortadera

The information in this report that relates to Mineral Resources for the Cortadera Project is based on information compiled by Elizabeth Haren, a Competent Person who is a Member and Chartered Professional of the Australasian Institute of Mining and Metallurgy and a Member of the Australian Institute of Geoscientists. Elizabeth Haren is employed as a Principal Geologist of Haren Consulting, who was engaged by Hot Chili Limited. Elizabeth Haren has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”. Elizabeth Haren consents to the inclusion in the report of the matters based on her information in the form and context in which it appears.

San Antonio Project

Tenements

Hot Chili, through its 100% owned subsidiary Sociedad Minera Frontera SpA ("Frontera"), executed an option agreement with a private party to earn a 90% interest in the San Antonio copper-gold project over a four-year period. The proposed JV involves an Option agreement over 27 mining rights (~4,727ha), whereby full ownership of 90% of the mining rights of the project will be transferred upon satisfaction of further payments of US\$300,000 in November 2023, and then a final payment of US\$6,600,000 a year after.

There were no tenement changes that had a material impact on the Mineral Resources during the reporting period.

Mining Activity

Mining rights are leased by the owner to a third party, with an annual cap of 50,000 tonnes of ore. Mining is ongoing at the San Antonio project but constituted only 1% of the tonnes publicly reported as San Antonio Inferred Resources. The maiden Mineral Resource utilised an underground drone survey to increase spatial confidence in historic mining activities.

Mineral Resources

There was a material change of 4 Mt for the Cortadera Project Mineral Resources between 1st July 2022 and 30th June 2023. The maiden and current Mineral Resource was publicly released on 31st March 2022 and can be found in the table below.

San Antonio Project Mineral Resource at 30th June, 2022											
Classification (+0.21% CuEq)	Tonnes (Mt)	Grade					Contained Metal				
		CuEq (%)	Cu (%)	Au (g/t)	Ag (g/t)	Mo (ppm)	Copper Eq (tonnes)	Copper (tonnes)	Gold (ounces)	Silver (ounces)	Molybdenum (tonnes)
Indicated	-	-	-	-	-	-	-	-	-	-	-
Inferred	4	1.20	1.10	0.01	2.10	2	48,100	47,400	2,000	287,400	6
Total	4	1.20	1.10	0.01	2.10	2	48,100	47,400	2,000	287,400	6

San Antonio Project Mineral Resource at 30th June, 2023											
Classification (+0.21% CuEq)	Tonnes (Mt)	Grade					Contained Metal				
		CuEq (%)	Cu (%)	Au (g/t)	Ag (g/t)	Mo (ppm)	Copper Eq (tonnes)	Copper (tonnes)	Gold (ounces)	Silver (ounces)	Molybdenum (tonnes)
Indicated	-	-	-	-	-	-	-	-	-	-	-
Inferred	4	1.20	1.10	0.01	2.10	2	48,100	47,400	2,000	287,400	6
Total	4	1.20	1.10	0.01	2.10	2	48,100	47,400	2,000	287,400	6

1 Mineral Resources are reported on a 100% Basis. All figures are rounded, reported to appropriate significant figures, and reported in accordance with the Joint Ore Reserves Committee Code (2012).

2 The San Antonio deposit is controlled through Frontera (100% owned by Sociedad Minera El Corazón Limitada, which is a 100% subsidiary of Hot Chili Limited) and has an Option Agreement with a private party to earn a 90% interest.

3 The Mineral Resource estimates in the tables above form coherent bodies of mineralisation that are considered amenable to a combination of open pit and underground extraction methods based on the following parameters: Base Case Metal Prices: Copper US\$ 3.00/lb, Gold US\$ 1,700/oz, Molybdenum US\$ 14/lb, and Silver US\$20/oz.

4 Metallurgical recovery averages for each deposit consider Indicated + Inferred material and are weighted to combine sulphide flotation and oxide leaching performance. Process recoveries: San Antonio – Weighted recoveries of 82% Cu, 55% Au, 82% Mo and 37% Ag. $CuEq(\%) = Cu(\%) + 0.56 \times Au(g/t) + 0.00046 \times Mo(ppm) + 0.0043 \times Ag(g/t)$.

5 Resource Copper Equivalent (CuEq) grades are calculated based on the formula: $CuEq\% = ((Cu\% \times Cu \text{ price } 1\% \text{ per tonne} \times Cu_recovery) + (Mo \text{ ppm} \times Mo \text{ price per g/t} \times Mo_recovery) + (Au \text{ ppm} \times Au \text{ price per g/t} \times Au_recovery) + (Ag \text{ ppm} \times Ag \text{ price per g/t} \times Ag_recovery)) / (Cu \text{ price } 1\% \text{ per tonne} \times Cu \text{ recovery})$. The base case cut-off grade for mineral resources considered amenable to open pit extraction methods at the Cortadera, Productora and San Antonio deposits is 0.21% CuEq while the cut-off grade for mineral resources considered amenable to underground extraction methods at the Cortadera deposit is 0.3% CuEq.

6 Mineral resources are not mineral reserves and do not have demonstrated economic viability. These Mineral Resource estimates include Inferred Mineral Resources that are considered too speculative geologically to have economic considerations applied to them that would enable them to be categorised as Mineral Reserves. It is reasonably expected that the majority of Inferred mineral resources could be upgraded to Measured or Indicated Mineral Resources with continued exploration.

7 The effective date of the estimate of Mineral Resources is March 31st, 2022. Refer to ASX Announcement "Hot Chili Delivers Next Level of Growth" ("Resource Announcement") for JORC Code Table 1 information related to the Costa Fuego Resource Estimate (MRE) by Competent Person Elizabeth Haren, constituting the MREs of Cortadera, Productora and San Antonio (which combine to form Costa Fuego). Hot Chili confirms it is not aware of any new information or data that materially affects the information included in the Resource Announcement and all material assumptions and technical parameters stated for the Mineral Resource Estimates in the Resource Announcement continue to apply and have not materially changed.

8 Hot Chili Limited is not aware of political, environmental or other risks that could materially affect the potential development of the Mineral Resources

Competent Person's Statement

Mineral Resources – San Antonio

The information in this report that relates to Mineral Resources for the San Antonio Project is based on information compiled by Elizabeth Haren, a Competent Person who is a Member and Chartered Professional of the Australasian Institute of Mining and Metallurgy and a Member of the Australian Institute of Geoscientists. Elizabeth Haren is employed as a Principal Geologist of Haren Consulting, who was engaged by Hot Chili Limited. Elizabeth Haren has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Elizabeth Haren consents to the inclusion in the report of the matters based on her information in the form and context in which it appears.
